- Vendor occupancy
- Interior upfit

Features

- Interior finishing
- Custom furniture
- Full scope project management
- Managed low voltage, electrician, furniture installer, security

TOYOTA MATERIAL HANDLING

Handling it all for an interior upfit

Project Overview

Toyota Material Handling Midsouth is a locally-operated equipment and warehouse solutions dealership servicing businesses across the Midsouth. From new equipment and used, to rental, service, parts and more, they are a full-service partner you can trust. They deliver world class material handling solutions that reduce costs, maximize productivity, and increase safety.

Toyota Material Handling came to RSI as a referral from a previous client who highly recommended us. They were moving into a new space and were starting from scratch. RSI was hired when they started looking for their interior finishing, and as a result we managed the entire interior upfit.

We did full onsite vendor occupancy and oversight project management services. This included interior design and test fits as well as FF&E. We managed vendors on behalf of the client for low voltage, electricians, installers for furniture, and security systems.

Our team of designers and project managers worked alongside the team at Toyota Material Handling to curate finishes and furniture needs that worked to bring the vision of each unique space to life. The finished spaces included training rooms, breakroom spaces, a reception area, and both shared and private corporate offices. We proposed multiple furniture options and alternate options to our client, undergoing multiple meetings with the client and respective selected vendors to determine final finishes and furniture selections as well as the project timeline and budget.
